Quick Facts

- » One Account for Savings and Lump Sums
- » Professional Trading Advisory
- » Managed Accounts
- » Low Cost Investment
- » No Exit Fees
- » Stop Loss Protection
- » Zero Tax Location
- » Daily Liquidity

IFAAB has 2 choices of accounts which when combined should cover most of an individuals exposure to asset markets.

Currency and Futures Account

The C & F account utilises a specific trading system. The system currently has a high win to loss ratio while the losing trades are controlled via stop losses. The ratio has been constant for 10 years and our numbers we use to make the trades have been back tested over the last 15 years. The account currently trades the following list of assets although more assets will be added to our pool of tradable assets as soon as we have completed further back testing. Our trades can be over a 5 minute time frame or up to a 2 week time frame, it depends entirely on the asset price action. We trade in both directions buying and selling so we have no bias as to a particular asset preferring instead to let the market dictate the action to ourselves which creates the trade set ups.

FOREX PAIRS	CURRENCY FUTURES	EQUITIES AND INDICES	METALS	MISCELLANEOUS
AUD-JPY	US Dollar Index	Germany	Gold	Corn
AUD-USD		Dow 30	Silver	Crude
CAD-CHF		India		Soybeans

EUR-AUD		US		Wheat
EUR-GBP		S&P 500		
EUR-JPY		Australia		
EUR-US				
GBP-CHF				
GBP-JPY				
GBP-USD				
NZD-JPY				
NZD-USD				
USD-CAD				
USD-INR				
USD-JPY				

GLOBAL TRADING, Ltd.

Stock, ETF and Fund Account

This account is traded and adjusted on a daily basis. With the protection of stop losses and trailing stops it enables accounts to move in to trending markets while protecting the accounts from strong reversals of trends. The account trades in both directions buying and selling assets. Utilising some of the specific trading system and numbers from the C&F account enables IFAAB to place your monies in the stronger trending markets whether they be up or down. We can also use leverage to enhance the performance of your account by purchasing double or triple performance ETF's should the trade set ups advise this on a risk return basis. Daily management and adjustments ensures that client accounts should not suffer deep falls during market corrections and if anything client accounts should profit from this.

Opening an Account

C&FAccount »

We accept a minimum of US \$10,000 although we do advise clients to invest US\$20,000 in to this account. Once the minimum is invested we can accept any amount on a monthly basis. This account has no exit fees.

Stock, ETF, Fund Account »

The account minimum investment is US\$ 10,000 and once this is invested we can receive any amount on a monthly basis. Should you wish to use this as a savings or pension account then this account is ideal for you as the account has no set term length and it can run for as long as you would like it to, you also have access to monies at anytime without incurring any exit fees.

Sole Discretion »

We take sole discretion for managing and investing in to assets and adjusting the investments on a daily basis. Please take note that we as a company do not make any profits from trading fees so rest assured we will only be buying or selling assets in your account when we feel it is the correct time.

The IFAAB Investment Philosophy

IFAAB philosophy is to keep things as simple as possible. Our aim is to bring you the most flexible investment product available, that can invest in an extensive range of assets worldwide.

Costs and Fees »

Our fees are the most competitive in the marketplace. By using technological systems which have not previously been used to deliver financial services direct to retail investors, the lower costs are passed over to the client. Our entry costs are 3% or 4% depending on size of investment and 10% of profits.

Investment Access »

Direct access to real-time 24 hours a day trading.

Investment Selection and Advisory Service »

A winning advisory service able to profit from market falls as well as rises.

The IFAAB view of asset markets is to have available as many different assets to trade as possible. Opportunities can be exploited where they arise, without any permanent commitment to any single market. We trade a wide selection of assets such as Funds, Stocks, Bonds, Forex, Options, Futures, ETF's & ETC's.

Client Reporting »

IFAAB client website shows real-time data on the assets inside each client account which updates every few minutes ensuring clients are kept up-to-date in real-time.

Access to Monies »

We have a zero exit fee policy. Allowing you immediate access to your monies is one of IFAAB's main priorities and all assets within an account can be sold on a daily basis, and monies withdrawn to your order.

Tactical Asset Allocation »

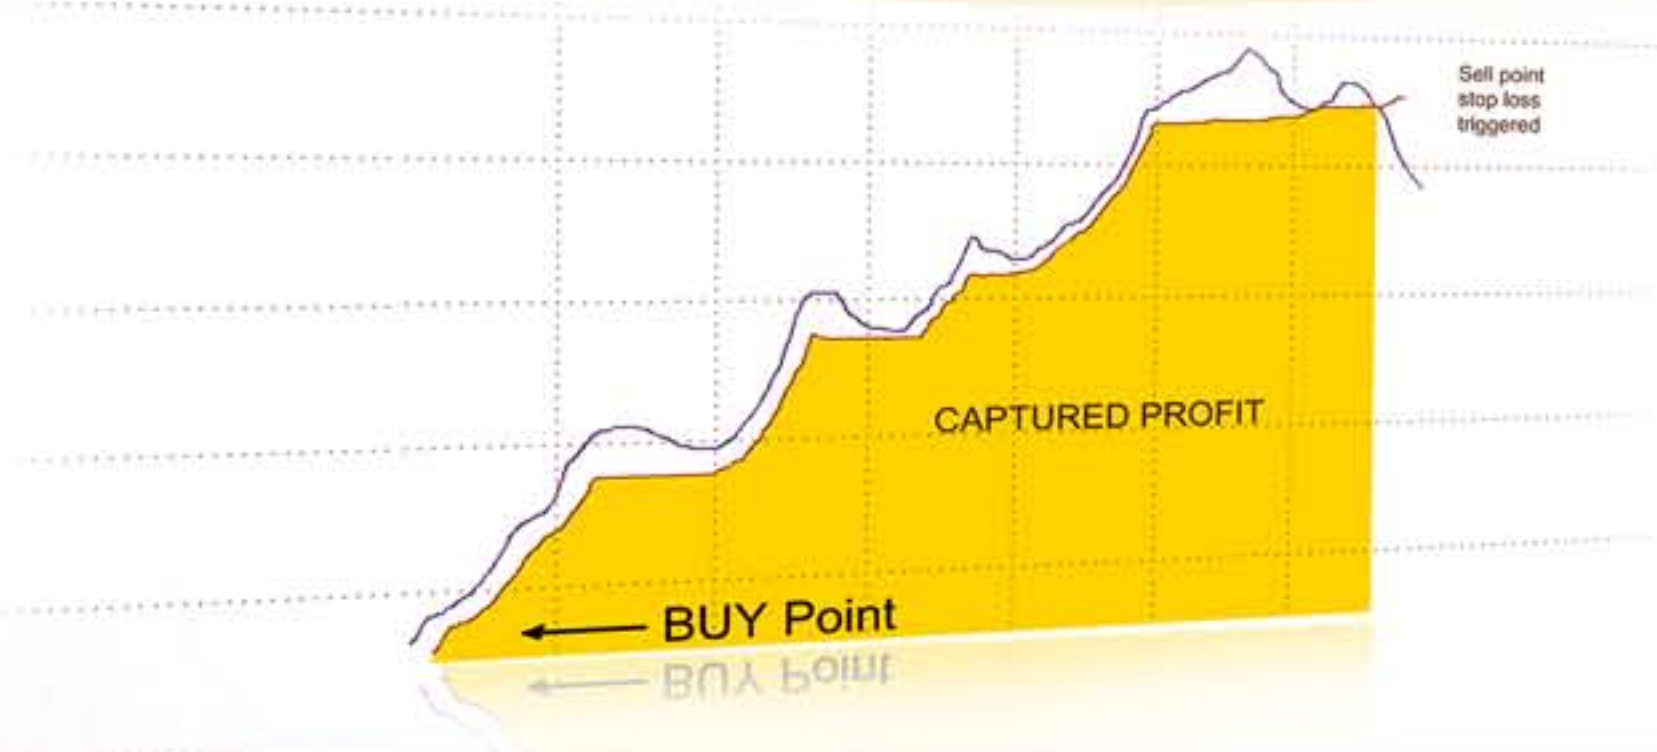

Asset allocation can change on a daily basis. Our analysts have guidelines to work from which are continually reviewed in order to benefit client accounts. A non-rigid asset allocation creates flexibility for our analysts during asset selection which should benefit all IFAAB clientele.

Market Volatility »

Volatility is part of life in all asset markets, and it will not be going away. We aim to reduce the harmful effects of this volatility with the aid of timing, stop losses and extensive analysis. All assets held by our managed accounts are reviewed daily and stop losses adjusted.

Stop Losses in Action »

Below, for an example of the approach we take, we show the chart of a trade and the rising stop loss level.

Trading Daily for our clients in the "Quest for Profits" »

There is no central marketplace for currency exchange; trade is conducted over the counter. The forex market is open 24 hours a day, five days a week and currencies are traded worldwide among the major financial centers of London, New York, Tokyo, Zürich, Frankfurt, Hong Kong, Singapore, Paris and Sydney.

The largest market in the world in terms of the total cash value traded, and any person, firm or country may participate in this market.

**IFAAB - The letters of our name stand for
International Financial Advisory and Assisted Brokerage**

Investment Portfolio Account

A grouping of financial assets such as stocks, bonds and cash equivalents, as well as their mutual, exchange-traded and closed-fund counterparts. Portfolios are held directly by investors and/or managed by financial professionals.

Market Timing

The amount of uncertainty or risk about the size of changes in a security's value. A higher volatility means that a security's value can potentially be spread out over a larger range of values. This means that the price of the security can change dramatically over a short time period in either direction. A lower volatility means that a security's value does not fluctuate dramatically, but changes in value at a steady pace over a period of time.

Market Timing

The act of attempting to predict the future direction of the market, typically through the use of technical indicators or economic data.

Savings Account

In a regular savings account, investors make monthly or quarterly payments to the investment account.

Stop Losses

An order placed with a broker to sell a security when it reaches a certain price. It is designed to limit an investor's loss on a security position.

Tactical Asset Allocation

This strategy allows portfolio managers to create extra value by taking advantage of certain situations in the marketplace. It is as a moderately active strategy since managers return to the portfolio's original strategic asset mix when desired short-term profits are achieved.

Trusts

A fiduciary relationship in which one party, known as a settlor, gives another party, the trustee, the right to hold title to property or assets for the benefit of a third party, the beneficiary.

Payments

IFAAB does not receive any client monies. All client monies should be sent directly to Global Trading Anguilla, British West Indies.

Global Trading is a white label platform originating from Saxo Bank Denmark

Anguilla, British West Indies

Location	Caribbean, 150 miles east of Puerto Rico
Legal System	English common law
Currency	Eastern Caribbean Currency (SEC) and \$US dollar (\$US)
Exchange controls	None
Banking confidentiality	Yes
Tax treaties	None

DISCLAIMERS

GOVERNMENT REGULATIONS REQUIRE DISCLOSURE OF THE FACT THAT WHILE THESE METHODS MAY HAVE WORKED IN THE PAST, PAST RESULTS ARE NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. WHILE THERE IS A POTENTIAL FOR PROFITS THERE IS ALSO A RISK OF LOSS. A LOSS INCURRED IN CONNECTION WITH TRADING FUTURES CONTRACTS CAN BE SIGNIFICANT. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION SINCE ALL SPECULATIVE TRADING IS INHERENTLY RISKY AND SHOULD ONLY BE UNDERTAKEN BY INDIVIDUALS WITH ADEQUATE RISK CAPITAL.

The decision to buy or sell any currency that may be listed in the Service is done purely at the subscriber's own risk. Under no circumstances will IFAAB Inc., its owners, officers, or employees be held liable for any losses incurred by the trading account Service. The risk factor is high in Forex trading and only "Risk Capital" or "Risk Funds" should be used in such trading. A person who does not have extra Risk Capital, or Risk Funds, that they can afford to lose, should not trade in this market.
